Efficiency and Reliability in Powder Coating Technology

ms

The MS topcoat series represents the latest technological advances for automatic and manual powder coating applications, while offering uncompromised performance characteristics.

Emphasized ease of maneuverability and performance of the powder gun are exhibited through a streamlined and ergonomically balanced design, created to effectively reduce operator fatigue. An ultra-light gun weight increases operator productivity. MS topcoat features a wide range of extensions and accessories, including an easily adapted sample cup accessory for the manual gun.

MS topcoat benefits from the latest in control technology. An easy to read operator touch screen control interface allows the operator access to simple and advanced control functions, even when wearing protective gloves.

Advanced feed-back signal control allows dramatically increased first-pass transfer efficiencies, amounting to considerably higher yields in powder application and productivity cost savings.

All guns are designed for ease of operator cleaning and maintenance. A minimum number of replacement spare parts ensure long life and reliability.

Take the test today and see why the exciting line of MS topcoat application equipment offers the best value in today's powder coating market.

MS topcoat series powder gun features:

- Ultra-light weight, only 380-grams / 13.4-oz.
- Ergonomic balanced gun design.
- Programs and powder settings accessible from manual powder gun.
- Automatic guns are extendable using tube and click system.
- Use of all commercially available powders, including metallic flakes.
- Range of tips and nozzles for all applications, including sample cup attachment.
- Ease of color change.

MS topcoat S4 control features:

- Easy to read and program digital touch screen control panel interface.
- Pre-programmed control functions set for first coat, re-coat and complex part geometry.
- Up-to 999, programmable slots available.
- Use with Corona or Tribo charging MS gun systems.
- Patented Corona feed-back circuit provides high quality finish with-out use of special accessories.
- Diagnostic control functions.
- Modular construction allows for easy expansion for manual or automatic applications.
- Modular control concept.

topcoat® Series

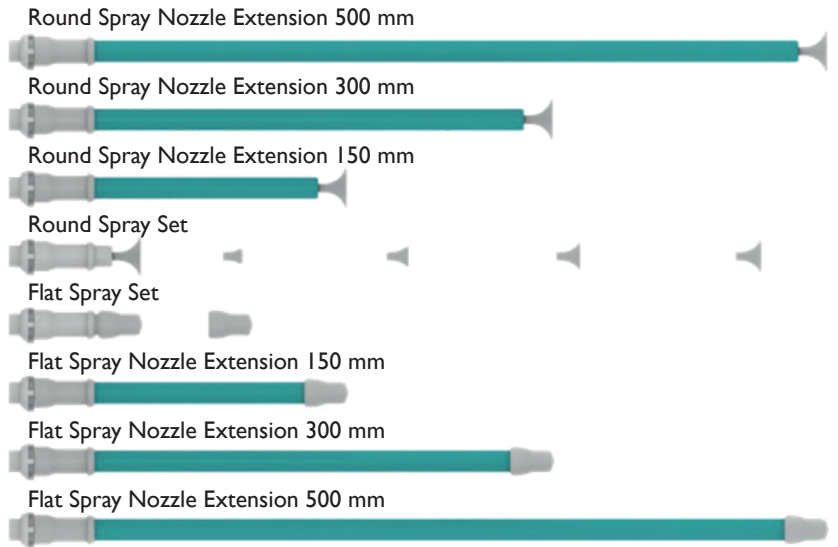

topcoat A4 automatic

topcoat M4 manual

topcase S4

topcase S4	
Controller S4	
Power Supply	(AC) 100-240 VAC / 50 - 60 Hz
Input Air Pressure	6 - 8 bar / 90-120 PSI
Measurements B x H x T	200x120x280 mm / 8"x5"x11"
Weight	4.1 kg / 9 LBS
Protection Category	IP 64
Connection	Tribo / Corona

topcoat M4 manual	
Powder Gun M4 / A4	
Weight	380g / 13.4 oz
Length	350 mm / 13.75"
Output Voltage	100 kV
Polarity	Negative Corona
Protection Category	IP 64
Powder Output	450g/min / 16 oz

topcoat M4 with Cup	
Powder Gun M4	
Weight	650g / 23 oz
Length	350mm / 13.75"
Output Voltage	100 kV
Polarity	Negative Corona
Protection Category	IP 64
Powder Output	450g/min / 16 oz
