

Maple 7/15 Pump

• Model 104041

IMPORTANT! DO NOT DESTROY

It is the Customer's responsibility to have all operators and service personnel read and understand this manual.

Contact your local Carlisle Fluid Technologies representative for additional copies of this manual.

READ ALL INSTRUCTIONS BEFORE OPERATING THIS PRODUCT

Product Description / Object of Declaration:	Pumps - Maple, DVP, 104009, 104010/LS, 104016, 104027, 104032, 104040/1/2, 104077, 104020, 104023, 104025, 104028/9, 106933, 104205,104149- 52, 104207-15, 104147.	EN
This Product is designed for use with:	Solvent and Water based materials	
Suitable for use in hazardous area:	Zone 1	
Protection Level:	II 2 G X IIB T4	
Notified body details and role:	Element Materials Technology (0891) Lodging of Technical file	
This Declaration of conformity / incorporation is issued under the sole responsibility of the manufacturer:	Carlisle Fluid Technologies UK Ltd, Ringwood Road, Bournemouth, BH11 9LH. UK	
EU Declaration of Conformity		(Ex)

The object of the declaration described above is in conformity with the relevant Union harmonisation legislation:

requirements EN 1127-1:2011 Explosive EN 13463-1:2009 Non ele requirements	U owing statutory docur y of Machinery - Gene ninery for the supply a e atmospheres - Explo ctrical equipment for	eral Principles and circulation sion prevention use in potent	for Design of coating ma on - Basic conce ially explosive a	terials under pressure - Safety	I
Providing all conditions complied with and also				oduct manuals have been local codes of practice.	
-	pehalf of Carlisle Fluid Technologies UK Ltd:	Bruetto	D Smith 27/6/18	Director of Sales (EMEA) Bournemouth,BH11 9LH,UK

STATIC CHARGE. Fluid may develop a static charge that must be dissipated through proper grounding of the equipment, objects to be sprayed and all other electrically conductive objects in the dispensing area. Improper grounding or sparks can cause a hazardous condition and result in fire, explosion or electric shock and other serious injury.

NEVER MODIFY THE EQUIPMENT. Do not modify the equipment unless the manufacturer provides written approval.

Do not operate the equipment if the safety devices have been removed.

PROP 65 WARNING. WARNING: This product contains chemicals known to the state of California to cause cancer and birth defects or other reproductive harm.

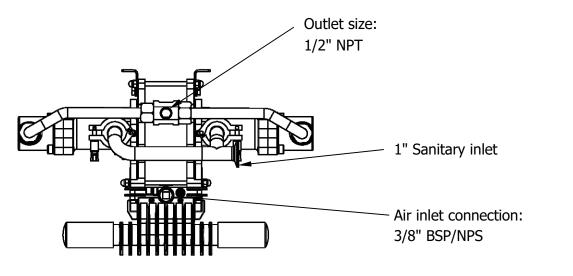

PINCH POINT HAZARD. Moving parts can crush and cut. Pinch points are any areas where ther are moving parts.

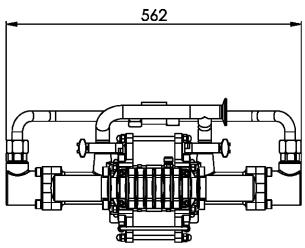

IT IS THE RESPONSIBILITY OF THE EMPLOYER TO PROVIDE THIS INFORMATION TO THE **OPERATOR OF THE EQUIPMENT.**

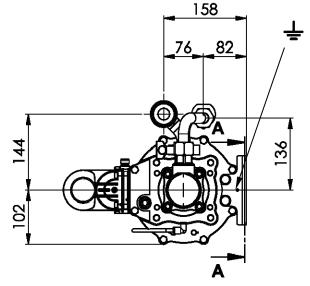

Specification

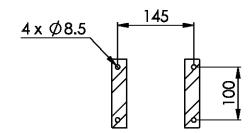

Ratio:	15:1
Maximum air inlet pressure:	7 bar [101.5 psi]
Maximum fluid pressure:	105 bar [1523 psi]
Nominal flow volume / cycle:	0.166 l/m [0.044 US gal/m]
Output @ 60 cycles / min:	10 l/m [2.6 US gal/m]
Maximum recommended continous cycle rate:Cycles/min	20
Maximum recommended intermittent cycle rate:Cycles/min	40
Fluid inlet connection:	1" Sanitary
Fluid outlet connection:	1/2" NPT
Compressed Air Inlet	3/8" BSPP / NPSM
Air volume / cycle @ 3.1 bar/45psi:	9.5 l/m [0.33 SCFM] @ 3.1 bar [45 psi]
Air volume / cycle @ 6.2 bar/90psi:	18.5 l/m [0.65 SCFM] @ 90 psi [6.2 bar]
Air consumption @ 15 cycles/min and 6 bar [87 psi] air inlet pressure:	
Air consumption @ 30 cycles/min and 6 bar [87 psi] air inlet pressure:	566 l/m [20 CFM]
Max. Pump Fluid Inlet Pressure	2 bar [30 psi]
Air Quality ISO 8573.1 Class 3.3.2 # See Note	Water: -20°C @ /bar [940ppm]
Weight:	30 kg / 66 lbs
- ,	ied - water +3ºC@7bar) may be used, however, uty mufflers 192821 or piped exhaust system should

Dimensions and Mounting Details

MOUNTING LOCATIONS SECTION A-A

Installation

This product should be flushed with a suitable compatible solvent prior to use.

Mount the pump securely and position the pump at a convenient height (below the lid height of the paint container), to allow for maintenance, visual observation, and periodic inspection.

The wall mount bracket is included with all pumps.

The Pump Mounting bracket must be connected to a suitable earth ground to ensure that there is no possibility of static build up.

Attach suitable flexible hoses to the inlet and outlet connections.

Connect a suitable 3/8" NB air hose and 1/2" Pressure Filter Regulator to the air motor.

(Filter rated at minimum 1000 l/min)

No additional air lubrication is required as piston ring lubricant is applied during assembly or repair.

If an air lubricator is used then this must be maintained.

Installation

Set the pump speed to a slow cycle rate and prime the pump to remove any air before increasing pressure.

Inspect for any air or fluid leaks.

Set the pump cycle rate to achieve the required paint volume and then adjust the system back pressure regulator and pump air pressure to achieve the desired system fluid pressure.

A Back Pressure Regulator should be mounted in the paint system return line.

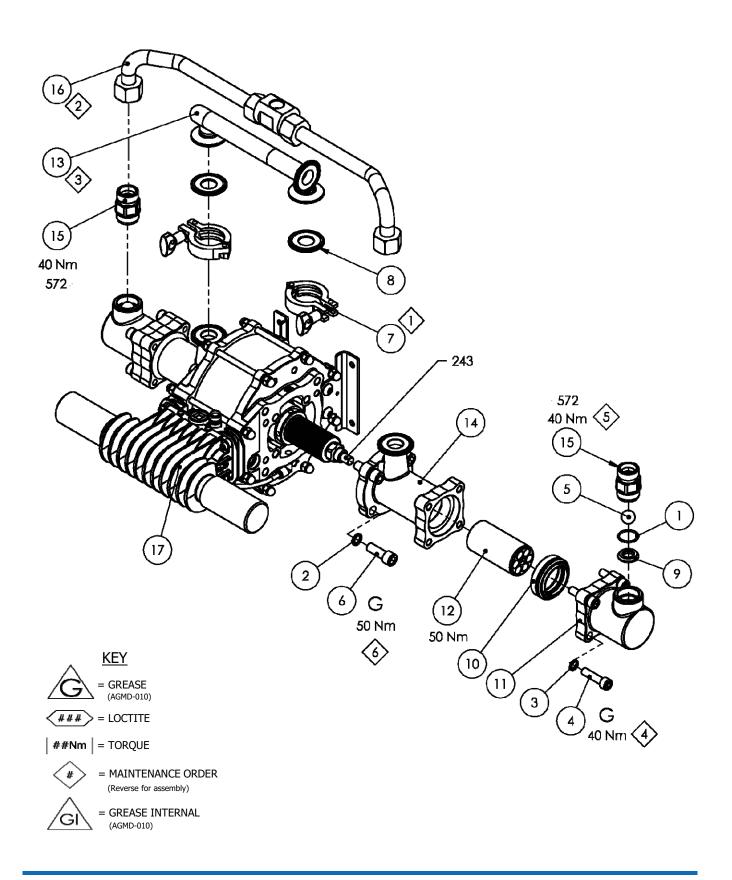

The return line 'back pressure' regulator responds to the changes in system fluid flow demand, (due to variable paint usage) by dynamically adjusting the paint flow rate returning to the system paint tank, thus maintaining the set pressure.

If an air blow out system is used, never exceed 2 bar [29 psi] on the inlet of the pump.

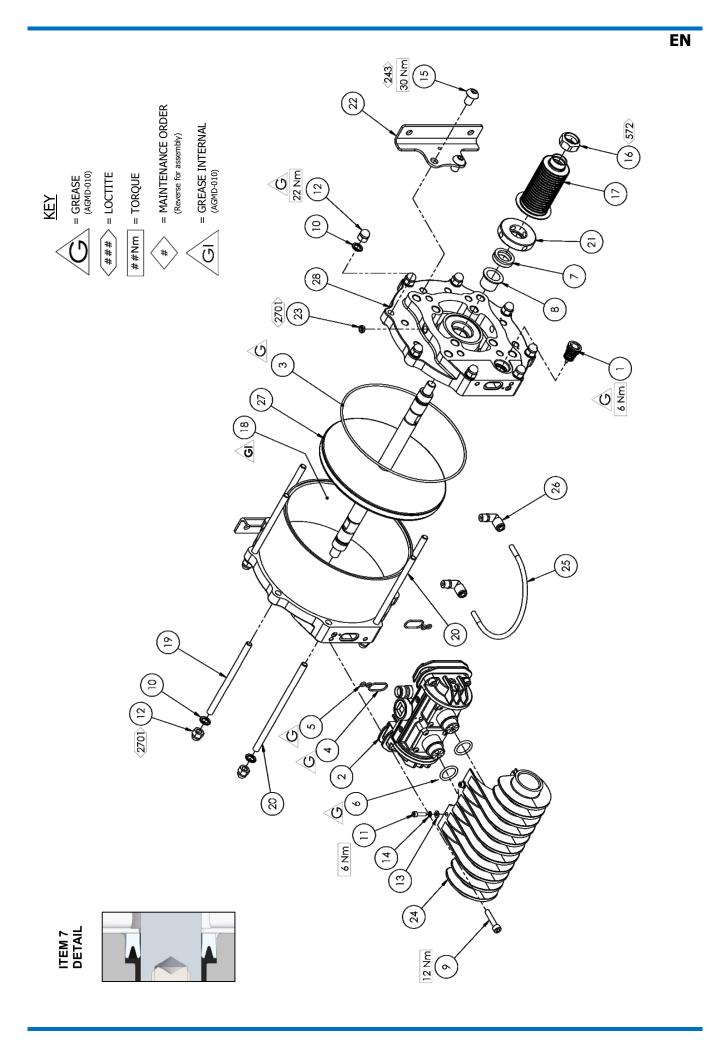

Exhaust kits are available for these pumps if the air exhaust is required to be piped away from the pump rather than exhausting locally through the mufflers.

	Parts list - Pump Assembly

	Fault Finding	
Symptom	Possible Cause	Remedy
	Air getting into the suction hose/manifold	Check seals and hose connections.
Pump will not 'Prime'	Worn piston seal.	Replace piston seals.
	Ball checks not seating correctly.	Inspect, clean and/or replace balls and seats.
	No Air or Fluid supply	Check air and fluid supply ball valves and supply hoses.
	Air piston seal worn.	Replace piston seal.
	Pilot valve assemblies inoperable.	Switch/interchange pilot valves to isolate faulty pilot valve and clean/replace.
Pump will not run	Pilot valve assemblies inoperable.	Check clean/replace Air valve.
	QE diaphragm defective.	Check for constant exhaust air when pump is not running. Check/replace QE diaphragms.
	Ball checks not seating correctly.	Inspect, clean and/or replace balls and seats.
Pump runs but has excessive pulsation.	Air getting into fluid line, air supply restricted.	Check seals and hose connections. Check air supply
	Obstructed fluid ball checks.	Remove, clean, and inspect seat, ball, and ball cage. Replace if suspect or worn.

	Fault Finding						
Symptom	Possible Cause	Remedy					
	Worn air motor piston seals.	Replace air motor piston seal.					
Pump runs but has excessive pulsation.	Worn/failed air motor shaft seals.	Disassemble pump as required to replace air motor shaft seals.					
	Worn fluid piston seal.	Replace fluid piston seal.					
	Air exhaust restricted.	Check QE diaphragms and exhaust outlets.					
Paint leaking into	Bellows seal failure	Replace bellows seal					
detection hose, Air bleeding from vent plug	Air motor shaft seal leaking	Check air motor shaft seal replace as necessary					

	Spares Kits for Maple 7/15 Pump

€	250657	Air Motor Seal Kit	1	details of individual kit contents		
4	250628	Control Valve Kit	1			
#	0115-010037**	Poppet Assembly	1	2 off per pump		
#	0115-010015	Main Spool & Sleeve Valve Assembly	1	1 off per pump		
#	193195	Piston seal	1	2 off per pump		
#	192579	Knifed Bellows	1	2 off per pump		

- Recommended spare parts for continually running pumps

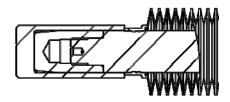

* Pumps before serial number 53971 will require; 192765 pilot spool assembly, control valve kit 250620.

Maintenance schedule				
Inspection	Operation			
Daily	Check for any general fluid or air leakage.			
Weekly	Inspect Pump for Correct operation Check for any excessive mechanical noise Check for excessive fluid pressure pulsation			
6 Month Test	Perform a pump stall test to ensure correct operation.			
	If pump does not stall check fluid piston seals and ball checks, replace as required.			
	If air is escaping through exhaust check air motor piston seal and quick exhaust diaphragm, replace as required.			
12 to 36 Months (Typically 10 million pump cycles dependant on air quality and abrasiveness of the paint used)	Replace air piston seal,			
	Replace shaft seals & bearings.			
	Inspect and replace if required: Pilot Air Valves & Main Air Valve Parts.			
	Replace fluid piston seal,			
	Replace Balls,Seats and Bellows.			

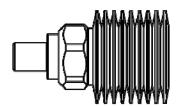

Bellows Replacement						
ITEM	PART NO.	DESCRIPTION	QTY	REMARKS		
1	502769	Bellows positioning tool	1			
2	502382	Bellows assembly spigot	1			

Screw Item No. 2 (assembly spigot) onto the piston shaft

Using Item No. 1, push bellows over spigot until located in groove.

Smear loctite 572 over nose of bellows, thread nut onto bellows ensuring the thread starts squarely. Grip bellows lightly by hand and tighten the nut with a 1" A/F spanner until the nut contacts the bellows shoulder.

Accessories					
PART NO.	DESCRIPTION	REMARKS			
192206	1" Sanitary Gasket				
192009	1 & 1 1/2" Heavy duty Sanitary Clamp				
192532	1" Sanitary - 1" BSPT (f) Adapter				
502608	Seal Insertion Tool	For Shaft seal (162703)			
502769	Bellows Positioning Tool
