

Cascade Assembly

HP-404 (79010-XX)

HP-505 (A10565-XX)

Due to global market constraints on raw materials, adjustments have been made on material selections used to house electronic packages of the Ransburg cascade assemblies HP-404 and HP-505.

These cascades are used in various electrostatic applicators.

The color black cascade shells are being temporarily used until our standard raw materials are readily available for production use.

Stringent tests on the black plastic material have been performed and verified it meets the insulation requirements for the sensitive electronics package once it is epoxied into a solid state condition.

Shown below is the difference in appearance of the temporary black cascade shell and the standard light brown cascade shell. Any questions please reach out to the Carlisle Fluid Technologies customer service team for further assistance.

WARRANTY POLICY

This product is covered by Carlisle Fluid Technologies' materials and workmanship limited warranty. The use of any parts or accessories, from a source other than Carlisle Fluid Technologies, will void all warranties. Failure to reasonably follow any maintenance guidance provided, may invalidate any warranty.

For specific warranty information please contact Carlisle Fluid Technologies.

For technical assistance or to locate an authorized distributor, contact one of our international sales and customer support locations.
